Product Features：

This machine is one of the series products of TOPEAGLE electronic pattern sewing machine. It is specially designed for large-scale electronic pattern sewing of packaged bags. It is equipped with Beijing DAHAO Stepping Closed Loop High Precision Servo Control System and High Performance Servo Motor Drive, and can set any sewing style within the prescribed range.

The Japanese imported five times super-large hook has a large amount of core yarn, and the sewing efficiency can also be ensured when 1200D high strength polyester sewing thread is used. The machine is designed with rigorous structure, precise and reliable transmission. It can set various parameters such as pattern, needle number, thread length and so on through random programmer. The input, storage, modification and invocation of patterns are convenient, and various patterns of programmed programs can be input through the USB interface for sewing. At the same time, the machine adopts Japanese SMC pneumatic components and Taiwanese silver guide rail, which greatly reduces the cost of maintenance and prolongs the service life of the machine.

The latest fully automatic bobbin changer can be equipped with five shuttle core sleeves at a time. The high-precision wire breaking detection design greatly improves the continuous working efficiency.

The new partnership service plan ensures that there are no worries in the use of products.
